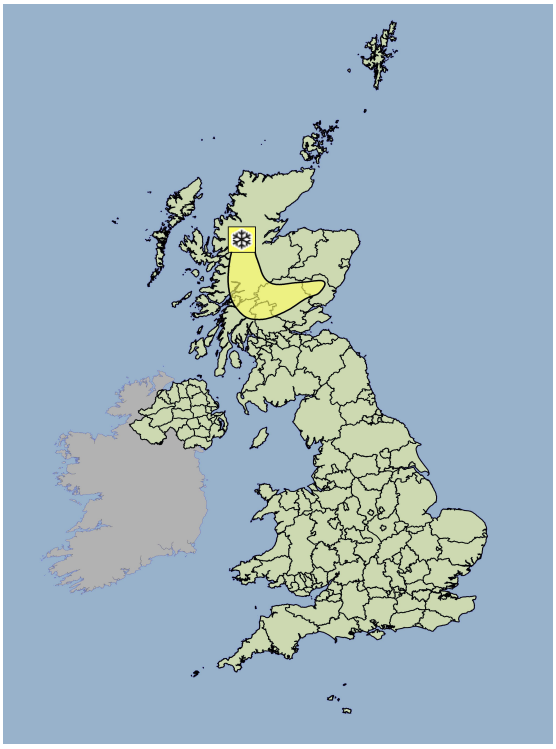
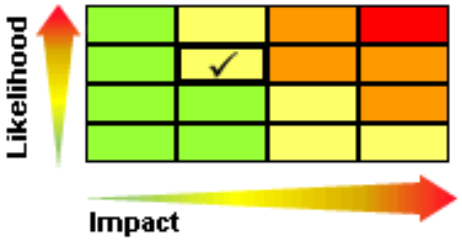
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal band will bring a further period of precipitation to parts of central and western Highland and the southern Grampians during Sunday night and Monday morning. Rain or sleet is expected at lower levels however, above 250 m, some wet snow is likely at times with perhaps 2 to 5 cm of snow accumulating, whilst above 400 m a further 10 to 20 cm is possible. Strong to gale force south to southeasterly winds will combine with heavy snow to result in blizzard conditions at times.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **18:00 on Sun, 26th Jan 2014** until **09:00 on Mon, 27th Jan 2014**

A further area of rain and snow will affect parts of Scotland during Sunday night and into Monday morning. The snow will affect the higher routes across parts of central Scotland with drifting in the gale force winds which will accompany the snow.

The public should be aware of the potential for disruption to travel as well as difficult driving conditions with a risk of blizzards at times.
